

Core vent

The core vents are manufactured from high-quality plastic wires to guarantee an efficient exhaustion of pouring gases.

Range of application:

Cast steel, grey cast iron, solitary aluminium casting (large cores) – mainly furan resin- and sodium silicate cores.

Product data:

Core vent PP: polypropylene-viscose (standard) / heat resistance up to 300 °C

Processing:

When inserting the core vents avoid bending of the cords.

Delivery and Packaging:

Diameter	cord length
[mm]	[m]
2	100
3	100
4	100
5	100
6	100
8	100
10	100
12	100
15	25
18	25
20	25
22	25
25	25
30	25

Storage:

Unlimited durability
